Portfolio: [Fiverr](#) [Upwork](#)

SUMMARY

Full Stack Web Developer and Data Automation Specialist with 7+ years of experience in high-performance website development, data extraction, and digital infrastructure. Adept at building scalable web applications using modern stacks (React, Next.js, Tailwind) and developing high-velocity web scraping pipelines. Proven expertise in integrating and tuning large language models (LLMs) for local deployment across multi-GPU environments. Strong track record in SEO, server-side management, and translating complex data into actionable insights and functional applications.

WORK EXPERIENCE

Full stack Developer (Contractor), NUST (National University of Sciences and Technology)

Pakistan based | hybrid 2023 - Present

- Direct full-stack development, portal installation, and automated deployment processes for departmental infrastructure.
- Designed, developed and maintaining two university websites: [ICESCO](#) and [Vision](#) for the SEECS (School of Electrical Engineering and Computer Science) department.
- Managed all CMS tasks, including content updates, event postings, and news/article updates, ensuring both sites stayed current and informative.
- Managed CMS updates, events, and graphic content.
- Oversaw full-stack development, SEO, keyword research, and performance optimization.

Head of IT, [swissmade.direct](#) (Remote, Switzerland)

Remote | 2023 - 2026

- Managed full website operations and infrastructure.
- Improved PageSpeed Insights score to 95+ for mobile and desktop.
- Increased daily orders from 2 to 12+ through SEO and UX improvements.
- Enhanced Core Web Vitals performance (90+ across metrics).
- Fixed all major SEO issues, improving rankings and visibility.
- Implemented and configured Facebook Pixel, Google Tag Manager, Clarity, Matomo, Google Business, Facebook/Google Merchant Centers.
- Server-side Management:
 - Configured object caching, Varnish, Cloudflare Enterprise, and advanced cache plugins.
 - Set up automatic daily backups to Google Drive.
 - Implemented strong anti-malware protection.
 - Mitigated a large-scale DDoS attack, resolved server crashes, and maintained high uptime.

Data Engineer & Frontend Developer

Remote | 2024 - 2026

- Built a dynamic Pakistani Weather web application using React, integrating a live weather API for real-time meteorological reporting for S2cool project
- Engineered intelligent web scraping pipelines utilizing Selenium to extract and structure 15 years of historical weather data across Pakistan.
- Conducted in-depth data analysis using Excel to interpret long-term climate trends, calculating standard deviations, mean averages, and statistical anomalies.
- Developed custom data extraction tools, including PDF parsers and image-to-text converters, to digitize unstructured meteorological reports.
